

## **TECHNORUN** **Information**

Participants in a team: 2 Registration fee: Rs. 100/-

### **Slot 1:**

#### **Round 1:**

Suppose there are 50 teams and if we consider 5 departments then 10 teams will be sent to each department with the help of the clue provided at the beginning of the event. A member of TechnoRunn will be present near each department in order to guide the teams to their tasks, which they will have to perform in a given time in order to proceed to the next round. In the first round only 25 teams will qualify for the second round.

#### **Round 2:**

In the second round all the 25 teams will be given a question paper consisting of some objective questions and fill in the blanks, which will test the basic knowledge of the participant about different branches of engineering. Here only 5 teams will qualify for the final.

### **Slot 2:**

Same procedure will be followed for the second batch of 50 teams, so that only 5 teams will qualify for final from this batch.

### **On Spot Registration:**

The teams who are registering on the spot will have to face a software round which will be based on basic technical questions. If 100 teams are registering on the spot then only 10 teams will be selected who will have to compete amongst themselves so that only 4 teams will qualify for final round.

### **Round 3(Final):**

The 14 teams who have qualified for final will have to play a set of minute to win it games. The teams who will complete the tasks in less time will be winners.
